

# Priyo Bhunia

priyabhunia39@gmail.com  [Priyo-Bhunia](#) **in** [priyo-bhunia](#) ♦ Kolkata, West Bengal, India

---

## EXPERIENCE

---

### Robotics And Simulation

- Contributed to Brain/neuroscience research through online forums, and providing feedback on research papers.
- Engineered a competitive line-following robot with key collection and shortest-path return logic.
- Executed simple movement policy for Robot in IsaacSim/Mjlab with other Physics Engine.
- CalHacks 13.0 University of California Berkeley.

## PROJECTS

---

### Robotics/Line follower

- Built a sensor-based line follower that can capture and return keys via shortest paths, detect RGB line colors and surface stillness, and use a perceptron for control instead of PID. Without using expensive hardware.
- simulated with the simulators with 90%+ accuracy .
- Worked on physics of simulators, Created Physics based simulation objects.

### Opensource developer Watch

- Working on Watchy watch Hardware-version2 .
- Implementing features like UART , USB-C.
- Compacting PCB size by 10 percent without extra cost.

### Keyboard-driven launcher app

[Github – Live](#)

- Developed multitasking shortcut app using Go-Lang and html, rich ,customizable ,easy to use and Multilingual.
- Integrated minimal Natural language processing using for diverse search with Intuitive fast real-time Ui.
- WIP– more language, post-processing, audio search, calculator, google search, transcript generation, model integration with 0% memory leak ,100% uptime.

### Medic App for Brain/Health

[Github – Live](#)

- Built-in videocall pipeline to consult directly with doctor. Access to limited local medicine.
- Multilanguage feature with built in offline Local Map.
- Real time data of available beds, Schedule appointment feature from specialized doctor.

## TECHNICAL SKILLS

---

**Software:** Python, GO, ROS, Linux, Git

**Simulation:** Gazebo, Isaac Sim, Webots, MuJoCo, PyBullet,Mjlab

**Control / Robotics:** Kinematics, PID, path planning, SLAM, localization

**AI/Perception:** OpenCV, object detection, sensor fusion, CV

**Hardware:** Arduino, Raspberry Pi, Jetson, ESP , STM, sensors, motors, microcontrollers,

## Other Skills

---

Neuroscience/Neuroengineering, System Design, Team work, Simulation

## EDUCATION

---

**Swami Vivekananda University**

**Graduation 2028**

*BS in Computer Science and Application*

*Kolkata, 700121*

- Currently pursuing Undergraduate in computer science
- **Coursework:** Mathematics, Physics , DSA, DBMS,Robotics, IOT
